

ISA Primary FRCA OSCE Course

Monday 12th May 2014. 08:30 – 17:00

The OSCE is an area of the exam that candidates can find difficult to prepare for. It requires extra revision time and this course is designed for those who have prepared for the exam and would like specific teaching sessions, exposure to simulation and experience of a full OSCE examination.

Examined by senior trainees with recent experience of the OSCE, you gain individual feedback as well as recent 'hot topics' and common pitfalls to help tailor your revision and preparation prior to the exam.

This course is aimed at candidates about to sit the forthcoming OSCE exam. Please note that places are limited; therefore we request that you only attend this course if you are fully prepared.

Cost - £95

Incorporating sessions on the following:

- Introductory lecture from a current College examiner with insight on the examination; how to prepare, expectations, format and mark scheme.
- A strategy to approach each of the various station types in the exam.
- Dedicated morning simulation session on critical incidents/resuscitation scenarios; one scenario for each candidate with exposure to a further 8.
- Rapid revision session on key physics and equipment topics commonly encountered in the OSCE.
- Communication skills workshop and tips for the OSCE communication skills stations.
- Complete 18 station mock OSCE (incorporating simulation) under examination conditions.

Numbers strictly limited to 18

Candidate Feedback

- Excellent course – wish it could be longer
- Communication and physics sessions were amazing
- Simulation session was brilliant - good to experience it before the exam
- Useful to go through the common simulation scenarios
- Afternoon exam was realistic and amazing preparation
